FIELD NOTES

OF THE

DEPENDENT RESURVEY

OF

A PORTION OF THE THIRTEENTH STANDARD PARALLEL NORTH,

THROUGH RANGE 76 WEST,

THE EAST BOUNDARY

AND

A PORTION OF THE SUBDIVISIONAL LINES,

TOWNSHIP 53 NORTH, RANGE 76 WEST,

OF THE SIXTH PRINCIPAL MERIDIAN,

IN THE STATE OF WYOMING

EXECUTED BY

RICHARD A. KOHLER

CADASTRAL SURVEYOR

Under Special Instructions dated SEPTEMBER 2, 1993, approved SEPTEMBER 2, 1993, which provided for the surveys included under Group Number 585, and assignment instructions dated SEPTEMBER 2, 1993.

Survey commenced SEPTEMBER 9, 1993

Survey completed AUGUST 24, 1994

THIRTEENTH

STANDARD

PARALLEL

NORTH

T. 53 N., R. 76 W., Sixth Principal Meridian, Wyoming

CHAINS

The following field notes are those of the dependent resurvey of a portion of the Thirteenth Standard Parallel North, through Range 76 West, the east boundary, and a portion of the subdivisional lines, Township 53 North, Range 76 West, Sixth Principal Meridian, Wyoming.

The history of surveys pertaining to this resurvey is as follows:

Edward F. Stahle surveyed the Thirteen Standard Parallel North (south boundary) in 1883. Mortimer N. Grant surveyed the east boundary in 1883. Charles Holcomb retraced the south and east boundaries and surveyed the remaining boundaries and the subdivisional lines in 1883. Russell C. MacDonald dependently resurveyed a portion of the south boundary and a portion of the subdivisional lines in 1947. Richard A. Kohler dependently resurveyed the north boundary in 1988-89.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions for Group No. 585, Wyoming, dated September 2, 1993.

Preliminary to the resurvey, the lines of the previous surveys were retraced and diligent search was made for all corners and other calls of the field note record. Identified corners were remonumented in their original positions; lost corners were reestablished and monumented at proportionate positions based on the latest official record, but only after exhausting every possibility of finding direct evidence of such corners. The retracement data was thoroughly verified and only true line field notes are given herein, which refer to the completed survey.

The survey was executed with a LIETZ Model SET4 electronic total station, a WILD Model T-16 theodolite and by chaining methods. The instruments were maintained in proper adjustment at all times. The directions of all lines refer to the true meridian, determined by hour angle observations of the sun at various points along the lines of survey and carried forward by sustained angulation.

Detectable Electronically Energized Particles (DEEP-1 TM) were buried as memorials at certain corner monuments. The DEEP-1 is composed of strontium encased in a color coded plastic container. The units are 1 inch in diameter, 2½ inches long, weigh 2½ ounces, and are magnetically detectable to an average depth of 8 feet.

	<p style="text-align: center;">GENERAL DESCRIPTION</p> <p>The area embraced by this survey is situated in Campbell, Johnson and Sheridan Counties, approximately 35 miles northwest of Gillette, Wyoming. The terrain varies from gently rolling to mountainous, with the elevation ranging from about 3,780 feet above sea level, where Wild Horse Creek crosses the north boundary, to about 4,580 feet above sea level along the divide between Wild Horse Creek and Deer Creek. The soil varies from gravelly loam to rocky clay with areas of exposed scoria. Vegetation consists of a light to moderate growth of sagebrush and native grasses throughout with scattered areas of juniper in the higher elevations and small stands of cottonwood along Wild Horse Creek.</p> <p>Primary drainage is provided by Wild Horse Creek, which courses northwesterly through the center of the township. Deer Creek also courses northwesterly, draining the southwestern portion. The remainder of the northeastern portion drains northerly toward Middle Prong Wild Horse Creek. Claybaugh Ranch is located in section 9 and the Rick Floyd Ranch in section 23, the area being suitable for grazing purposes. There is limited evidence of oil and gas exploration.</p> <p>Access is provided by Echeta Road, which follows along Wild Horse Creek, as does the Burlington Northern Railroad, and by numerous trail roads leading into the mountainous areas.</p>

CERTIFICATE OF SURVEY

249

I, Richard A. Kohler, Cadastral Surveyor, HEREBY CERTIFY upon honor that, in pursuance of special instructions bearing date of the 2nd day of September, 1993, I have dependently resurveyed a portion of the Thirteenth Standard Parallel North, through Range 76 West, the east boundary, and a portion of the subdivisional lines, Township 53 North, Range 76 West, of the Sixth Principal Meridian, in the State of Wyoming, which are represented in the foregoing field notes as having been executed by me and under my direction. Said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.

Richard A. Kohler
(Cadastral Surveyor)

CERTIFICATE OF APPROVAL

BUREAU OF LAND MANAGEMENT
Cheyenne, Wyoming

The foregoing field notes of the dependent resurvey of a portion of the Thirteenth Standard Parallel North, through Range 76 West, the east boundary, and a portion of the subdivisional lines, Township 53 North, Range 76 West, of the Sixth Principal Meridian, in the State of Wyoming, executed by Richard A. Kohler, Cadastral Surveyor, having been critically examined and found correct, are hereby approved.
